

Here's an example of a scale that works well for most projects and aligns nicely with the spacing and sizing scale recommended in *"Establishing a spacing and sizing system"*:

12px	The quick brown fox jumps over the lazy dog
14px	The quick brown fox jumps over the lazy dog
16px	The quick brown fox jumps over the lazy dog
18px	The quick brown fox jumps over the lazy dog
20px	The quick brown fox jumps over the lazy dog
24px	The quick brown fox jumps over the lazy dog
30px	The quick brown fox jumps over the lazy dog
36px	The quick brown fox jumps over the lazy dog
48px	The quick brown fox jumps over the lazy dog
60px	The quick brown fox jumps over the lazy dog
72px	The quick brown fox jumps over the lazy dog

It's constrained just enough to speed up your decision making, but isn't so limited as to make you feel like you're missing a useful size.
